***The Remote Control FOB [400-030] must have the 400-019 or 400-029 remote control package upgrade included on the order to be valid. 400-030 indicates ordering additional remotes on existing remote control packages, allowing multiple users to have individual control of fill and agitation functions. If the loadstand option is selected [400-056], the boom remote control package is compatible with loadstand functionality.*
