

DRIBBLE TOOLBAR 1

EVEN COVERAGE, EVERYTIME.

Meet Bazooka's Dribble Bar 1. Featuring lay flat dribble lines spaced one foot apart, you can achieve uniform liquid manure coverage across the field, every single time. It's coverage you can count on.

- Widths from 36' - 44'
- Coverage widths from 36' - 44'
- 3" Diameter dribble Line quantities from 36 to 44
- GPA Rates from 3,000 - 20,000+
- Standard with timed manifold
- Manual, single-folding wings

FEATURES

HIGH APPLICATION RANGE INCREASES PRODUCTIVITY

Dribble lines place liquid manure directly in contact with the ground. The Dribble Bar allows operators to apply anywhere from 3,000 – 20,000+ gallons per acre through the dribble lines that are spaced one foot apart from one another.

NARROW TRAVEL WIDTH

When we say narrow travel width, we mean it. The Dribble Bar 1 folds to an overall 5.5' width, making transport between jobs a cinch.

DRIBBLE TOOLBAR 1
