

# PORTABLE PIG LAUNCHER

- Launch cleanout pigs from any part of your hose layout
- Easy-to-use trailer
- Heavy-duty gate valve for bypass and Launcher

## THE ULTIMATE CLEANER. BUILT MEANER.

The Portable Pig Launcher is built to clean multiple hose sections at once, and even allows you to purge specific sections rather than entire hose layouts. With this speed and flexibility, you'll be able to make a clean break right to the next job.

Reduces time to clean hoses. The Portable Pig Launcher trailer allows operators to purge specific sections of hose, as opposed to the entire layout, for a quick hose cleanout. The launcher will accommodate foam balls or bullet-style "pigs". Available in 6", 8", and 10" models, this is your answer to saving time in the field.

## SPECIFICATIONS
