

PTO BOOSTER PUMP

SMART FOR YOUR WALLET AND YOUR OPERATION.

The PTO Booster Pump is a convenient, cost-effective solution for smaller operations or dairy and hog farms that manage their own liquid manure. It's compact, easy to tow and powered by your tractor. This pump is used in place of an engine unit, saving you time and hassle. Simply put: it's the productivity "boost" you've been looking for.

- **Economical Tractor-driven pump**
- **Variety Pump options available**
- **Variety of Plumbing options**

FEATURES

SAVE TIME WITH BYPASS & PIG LAUNCHER OPTIONS

This allows the clean-out ball to bypass the pump and continue through the full length of hose eliminating disconnecting or additional purging.

SIMPLIFIED DESIGN, COMPACT FRAME

This PTO-driven pump allows for simple connection to any tractor and can conveniently be pulled from site to site with its compact frame. Did we mention the biosecurity factor? Win, win.
