

AGITATE AND PUMP WITH NEXT-LEVEL POWER.

The Bazooka Farmstar Pit Pal submersible liquid manure pump can agitate or pump from 800 to 1,100 GPM, and is 100% portable. It brings convenience, efficiency and power.

- **Tractor Hydraulic submersible pump for 1,100 GPM**
- **Low-cost liquid transfer or force-feeding from deep pits**
- **Manual actuated gate valve to shut off flow**

FEATURES

TANK LOADING OR FORCE-FEEDING

The Pit Pal is ready to work in a variety of ways. Utilize your Pit Pal to transfer liquid manure from pit to pit, load liquid manure tanks or fill over the top with a Bazooka Farmstar Portable Loadstand. Operators can also force-feed high-pressure pumps. Talk about versatility.

GATE VALVE

The manual gate valve allows liquid manure flow to be shut off without having to stop the hydraulics. This is all done using a simple lever and connecting rod located outside of the liquid manure pit.

SPECIFICATIONS

STANDARD

- Weight: 240 lbs.
- 4" diameter discharge
- Includes (2) 25' hydraulic hoses that can hook up to any auxiliary hydraulics
- Hydraulic requirements: 17 GPM
