

# RENEGADE 1 AGITATION TRAILER

## MOVE MORE LIQUID MANURE, FASTER.

Introducing Renegade: the elite agitation trailer designed to maximize efficiency when agitating, transferring, filling tanks or force-feeding from a liquid manure source. This multi-use agitation solution delivers performance and speed when you need it most.

- Reduce time between fields
- Low maintenance design
- Simple operation
- Accomplish more in less time with fewer operators
- Safely travel roadways, bridges, and through towns
- Biosecure solution

## FEATURES

### EFFICIENCY MAXIMIZED

With the Renegade, you can pull right up to the manure source with your transportation vehicle for quick and easy setup into the liquid manure pit. Start your engine, begin agitation and work for 16+ hours without refueling.

### LONGER BOOM, MORE REACH

The Renegade features a 29' boom (15' below-grade pumping depth). The boom's length and triple-fold design allow for extreme control and maneuverability when placing the submersible pump into the liquid manure source.

### REMOTE CONTROLS

With our optional rechargeable remote controls, you can place the pump and operate the agitation, pump, force-feed and tank fill functions. We offer remote fobs for tank crews that allow each tank operator to remotely switch from agitate to fill mode without shutting down or leaving their tractor cab when they pull up under a loadstand.

### CONVENIENT 10" DIAMETER LOADSTAND

The integrated loadstand upgrade option takes the 35' portable loadstand out of the equation for easier travel between job sites and an easier setup once on site.

# RENEGADE 1 AGITATION TRAILER

## SPECIFICATIONS

### STANDARD

- Length – 21' 10"
- Width – 8'
- Deck Height – 2' 11"
- Travel Height – 11' 5"
- Weight [Bumper Pull] – 11,350 lbs. [not including fuel]
- Tongue Weight [Estimated] – 1,200 lbs. Full | 700 lbs. Empty
- 173 HP Engine | Tier 4 Final 3.8 L Cummins
- [2] 3.5" Diameter Agitation Nozzles
- Manual Agitation and Boom Controls
- [2] Hydraulic Rear Outriggers
- Electric Drum Brakes
- 20-Gallon Hydraulic Oil Tank
- High-Capacity Hydraulic Oil Cooler
- Heavy-Duty Hydraulic Boom Cylinders w/ Counterbalance Valves
- Hydrostatic Piston Pump [100cc Variable Displacement up to 5,100 PSI]
- 8" Steel Plumbing
- 90° discharge elbow
- Discharge extension for pumping out of 14' deep pits

- Single, 12,000 lbs. Spring Leaf Axle
- 150-Gallon Steel Fuel Tank
- DOT Trailer Lighting
- LED Flood Lighting
- [3] on Boom
- [2] on Engine
- [1] LED Spotlight on Rear Engine Controls
- 13 Sq. Ft. Front Basket Built-In Storage
- Manual 10,000 lbs. Front Jack

### UPGRADES

- 180 CC Hydrostat Motor | Up to 3,500 GPM
- 10' Integrated Loadstand
- Hydraulic Hose Reel
- Remote Control
- Tank Fill Remote Fobs
- Boom Remote
- 360° Flood Light Halo, [6] LED Flood Lights Included
- Hydraulic 20,000 lbs. Tongue Jack
- Nexus Hydrostat and Engine Control
- 8" Flowmeter and Plumbing
