

BAZOOKA • FARMSTAR

QUALITY. INNOVATION. SERVICE.

ADVANTAGES OF A SINGLE PTO SHAFT

- Reduces the risk of downtime with fewer joints and no carrier bearing to maintain.
- Boosts visibility and efficiency when placing the pump in the manure pit.
- Convenient and secure, PTO shaft mount eliminates the need to transport additional PTO shafts.

AGITATION NOZZLES fold within the diameter of the submersible pump to create a slim profile for entry into the liquid manure pit.

20.5" BAZOOKA SUBMERSIBLE PUMP

OFFSET TRAILER TONGUE gives the operator more room to work and easier access to the PTO shaft, resulting in more uptime.

POSITION INDICATORS show nozzle direction and gate valve status.

TRAILER
RIPTIDE
VERTICAL PIT PUMP

REACH UP TO 5850 GPM

• **ACHIEVE 8' - 9' PUMPING DEPTH** with this long-lasting, heavy-duty agitation pump.

OPERATE CLOSER TO THE PIT'S PUMP OUT for easier pump placement and setup with Trailer Riptide's patent pending folding feature. Plus, closer proximity to the pump out provides more room for additional equipment, like semis and tanks, to pass through.

• **OPTIONAL, DUAL HYDRAULIC AGITATION NOZZLES** Use the hydraulic valve bank to rotate the agitation nozzles, open and close gate valves and change the upper nozzle's vertical angle.

• **SAFELY TOW BEHIND A PICKUP TRUCK AT HIGHWAY SPEEDS.**

MORE COMPACT, LESS COMPLEX.
