

# PHANTOM EDGE SERIES

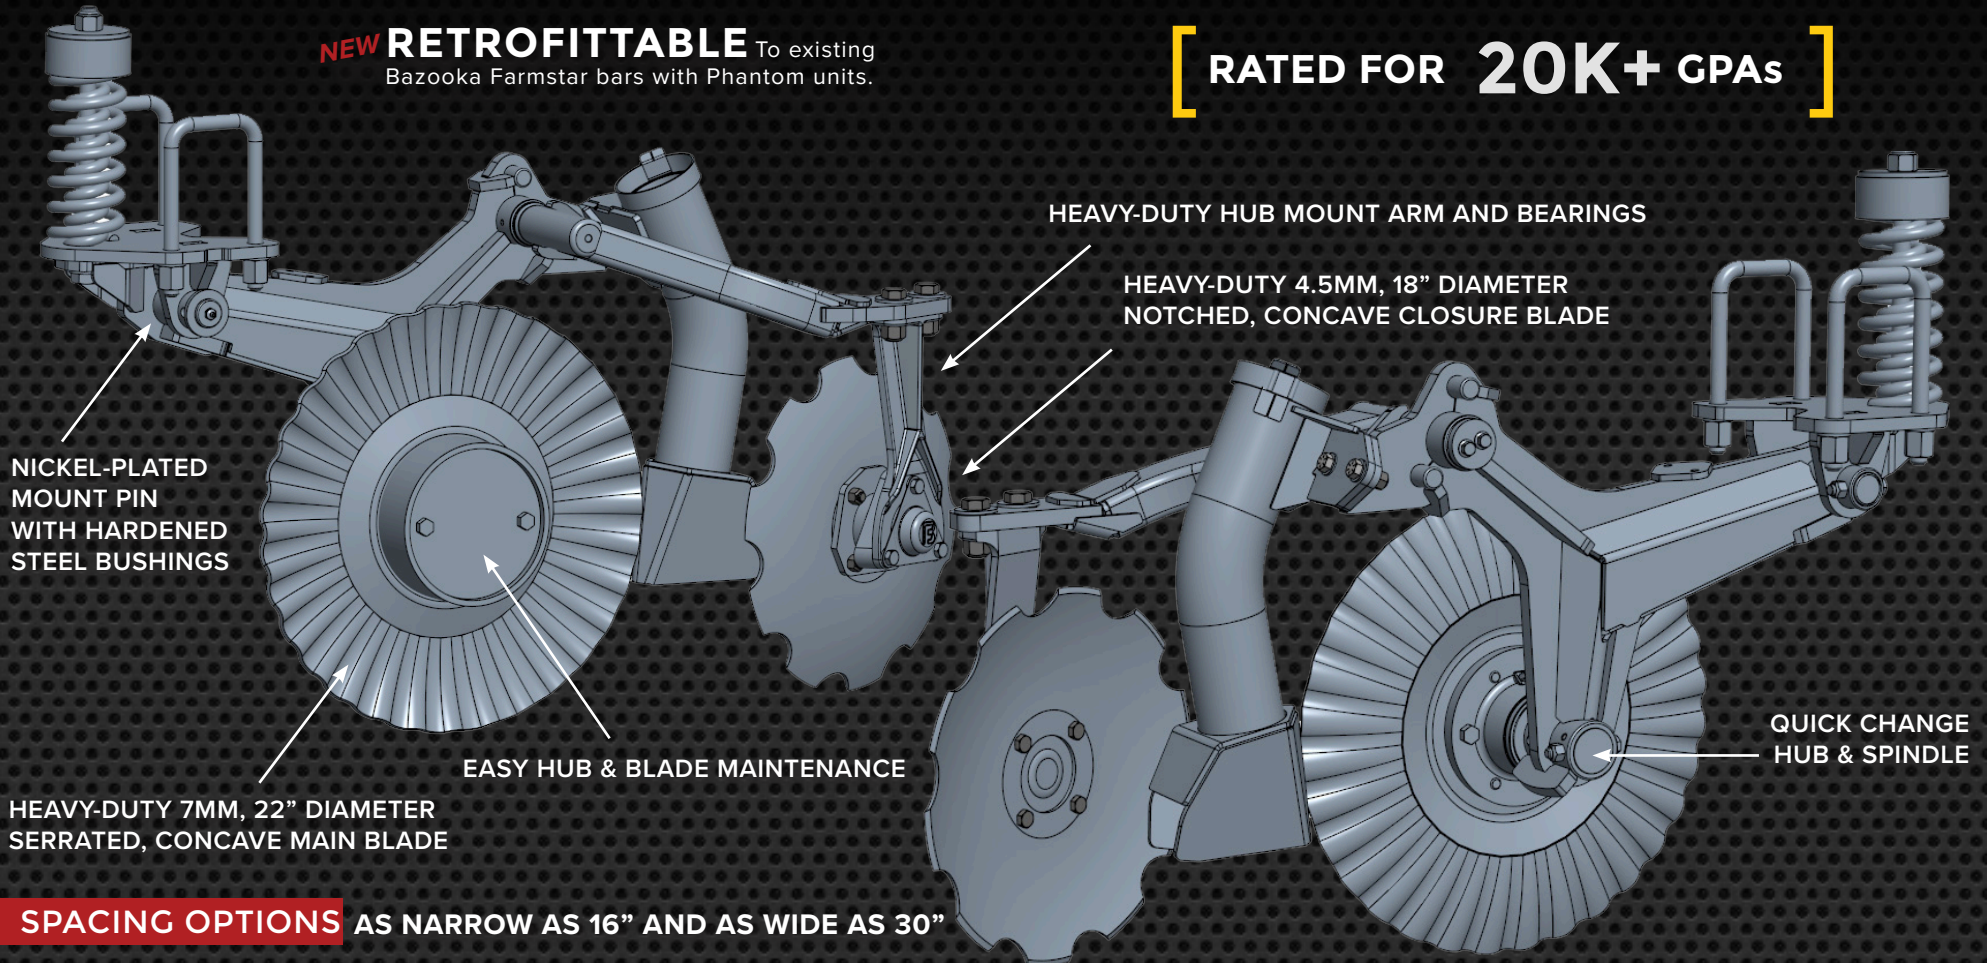

Same narrow spacing options.  
Same low maintenance design.

## IMPROVED GROUND PENETRATION

The serrated, concave main blade easily penetrates hard ground and creates a larger, cleaner 'trench' to accommodate higher volumes of liquid. The notched, concave closure blade with an updated closure arm angle follows closely behind rolling loose ground back over the trench for thorough coverage.

**NEW RETROFITTABLE** To existing  
Bazooka Farmstar bars with Phantom units.

[ RATED FOR 20K+ GPAs ]

**SPACING OPTIONS** AS NARROW AS 16" AND AS WIDE AS 30"

# THE COMPETITIVE EDGE.
