

3,500 FULL THROTTLE OUTLAW FORCE-FEED TRAILER

BIGGER GPM. BIGGER PRODUCTIVITY.

The 3,500 is our largest GPM capacity Full Throttle Outlaw force-feed pump trailer built with the same heavy-duty features you know and love from this trailer line. With a triple-section boom made of steel and EPDM hose, this pump trailer maintains a compact, user-friendly design that is low-maintenance, long-lasting, and improves liquid manure flow.

- Reduced setup time
- Simple maneuverability
- Achieve high GPM
- Simple, low-maintenance design

FEATURES

INCREASED UP-TIME

The Full Throttle Outlaw delivers quick transport and set-up time, by eliminating the need for a tractor, pit pump, lagoon pump, hose, etc. to get the job done.

UP TO 3,500 GPM CAPABILITY

An 18" white iron BAZOOKA Farmstar submersible pump is integrated on the end of the Outlaw's 35'+ triple-section boom structure, allowing you to reach up to 3,500 gallons per minute (GPM).

INDUSTRY LEADING (TRAILER) PUMPING DEPTH

The Full Throttle Outlaw achieves the deepest pumping depth of any boom trailer unit on the market, ringing in at a 19' below grade depth.

41' BOOM REACH

Our 'high-reach' model gives you an extra six feet to work with. The boom can reach over an 18' high slurry storage and touch the bottom of the storage unit.

3,500 FULL THROTTLE OUTLAW FORCE-FEED TRAILER

SPECIFICATIONS

STANDARD

- 18" White Iron Bazooka Farmstar Submersible Pump
- 35' or 41' Triple-section boom
- Single, 500-gallon steel fuel tank w/ baffles and sump area
- [2] 15,000 lbs. Leaf spring axles
- [4] Used super single tires
- Heavy-duty tube and I-beam frame structure
- Centralized auxiliary hydraulic controls
- 30" stroke hydraulic stabilizer jacks with swivel pad
- Rear hydraulic outriggers Hydraulic boom cylinders with counterbalance valves
- 12,000 lbs. greasable, quick-change hubs and spindles
- Reinforced front deck with integrated tie-down locations
- Rear hitch receiver and trailer plug
- Rear axle electric over hydraulic brakes
- Discharge plumbing (For optional flowmeter)
- Pig Launcher with chained cap
- EPDM corrugated intake hose
- [6] LED floodlights
- LED Hydraulic Control Illumination
- Fenders

- DOT Lighting
- Bumper or Gooseneck Hitch
- Built-in storage baskets for parts and tool storage on the front of the frame

STANDARD OPTIONS

- 600 HP engine
- 700 HP engine
- 6819MPC Cornell pump

UPGRADES

- Wireless Boom Remote (12V or 24V)
- Agitation nozzle and hydraulic valve
- Pig Launcher and clean-out
- [4] New Super Single Tires
- [4] 550 Series Flotation Tires
- 6" or 8" Krohne Flowmeter
- Nexus electronic controls
- Electric over Hydraulic Brakes
- 5,000 PSI Hydraulic Hook-Up for Auxiliary Submersible Pump
- Trailer Tongue Toolbox (48" X 18.5")
