

WOLVERINE SERIES AGITATION BOAT

CONTROL FIT FOR A (MANURE) KING

The propellers and optional gun perform as two independent systems to counteract thrust produced by the gun.

ACHIEVE 24,000+ GPM

The gimbaled props circulate massive amounts of liquid at a high velocity, keeping solids in suspension throughout the agitation process.

PROP-POWERED AGITATION The Wolverine is equipped with 2, 20" diameter, fully articulating ragless propellers providing unmatched maneuverability, agility, and agitation efficiency.

RUGGED, YET SIMPLE

The Wolverine was designed with service in mind, incorporating only eight hydraulic cylinders making it intuitive and *low maintenance* while withstanding the elements.

SUPERIOR STABILITY due to its low center of gravity & extra flotation.

GAMECHANGING DRIVE SYSTEM

CLIMB OUT OF STEEP BANKS WITH THE HIGH-TORQUE, 4-WHEEL DRIVE SYSTEM FEATURING DOUBLE-ACTING, INDEPENDENT STEERING CYLINDERS & LARGE DIAMETER, AGGRESSIVE TIRES.

7.1 LITER 302 HP TIER 4 ENGINE for next-level performance.

CRAB STEERING CAPABILITIES

made possible by the *always in sync*, double-acting steering cylinders located on the front and rear of the Wolverine Series agitation boat.

THE LEGEND BEGINS.
